To whom it may concern,

Reference - Andy Kitchin

This is to confirm that Andy joined SKM in early 2006 after completing Project Management of wharf construction works undertaken by contract at Port Adelaide Outer Harbor Terminal for Flinders Ports.

Andy was employed by SKM as Project Manager and initially managed implementation of the \$7m SABRENet project, the first stage rollout of a high capacity private fibreoptic IT network for educational and research facilities in Adelaide. The project was delivered very successfully, on time and within budget, and is currently being extended as additional research organisations and educational campuses choose to take advantage of the network.

Andy has developed good working relationships with clients and, through process innovation and proactive management, demonstrated he possesses a strong appreciation of Project Management as well as contracts to the AS 4000 suite of standard contracts and the roles of Superintendent and Superintendent's Representative.

Other projects on which Andy has provided PM and Supervision services include the contract for rehabilitation works at Millbrook Dam for SA Water, scoping and specification for a package Desalination Plant for a confidential client and projects for TransAdelaide.

Andy is currently providing Supervisory services for SKM on the design and construction of infrastructure facilities for the AWD Project at Techport for the Australian Shipbuilding Corporation at Osborne.

Recently he has elected, for family and flexibility reasons, to become an independent contract Project Manager and we are pleased that he will continue to provide services to SKM on appropriate projects, including SABRENet, as agreed from time to time. We look forward to the continuing relationship and wish him well with family and his career.

Yours sincerely,

Daryll Pain

Manager, Power and Industry SA
